EXPERIENCE

BrandMobile, Lagos — *Senior Backend Developer.*

June, 2021 - Present

My day to day role consists of optimizing servers for speed and stability, implementing security structures, generating reusable code libraries and generating data storage solutions.

Multistream Technologies, Lagos — *Senior Software Engineer.*

June, 2019 - August 2021

Multistream specializes in the development and implementation of innovative technology products and solutions for public and private sectors.

PayChange Global Solution, Lagos— *Senior Software Developer*

April, 2020 - March, 2021

I was responsible for curating the structure of server side information and processing in a fintech domain. I primarily wrote server scripts and API's to be utilized by front side engineers and UX designers.

Dominahl Technologies LLC, Lagos— Team Lead

August, 2015 - June, 2019

I was overseeing the overall development of the software being built. Dominahl Technologies being a software outsourcing company, I supervised the development and deployment of applications to both clients and customers. During this period, I used the best practices for deployment of our software.
